Professional Summary

As an engineer, I tackle problems by breaking them down, analyzing constraints, and building solutions that work effectively and deliver tangible impact.

Technical Skills

Languages: C/C++, JavaScript

Web Technologies: HTML, CSS, ReactJS, Tailwind CSS, Node.js, Express.js, Firebase

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, VS Code

Projects

Scene-Share: Real-time Co-watching Application | React, Node.js, Firebase, Agora **October 2025**

🔗 Live | 🐙 GitHub

- Addressed the file upload limitations of the original Movie Night project by re-engineering the application to use **real-time screen sharing with Agora RTC**, removing a major point of user friction.
- Built a more scalable and maintainable application by migrating to a modern tech stack, including React for the frontend and a **serverless architecture** with Firebase for the backend.
- Improved the user experience by enabling hosts to stream content **directly from their screen**, which eliminated the need for file conversions and simplified the process of starting a co-watching session.

Movie Night: Synchronized Movie Watching Platform | Node.js, Firebase, WebSocket **July 2025**

🔗 Live | 🐙 GitHub

- Enabled a shared movie-watching experience for remote users by building a **custom playback engine with WebSockets** that kept video playback perfectly synchronized for everyone in the room.
- Made the remote viewing experience more social by integrating **live video and audio chat**, allowing users to interact naturally as if they were in the same room.
- Solved the challenge of distributing a local video file by using **Firebase Cloud Storage**, allowing a host to upload their movie once for everyone in the room to stream.

Education

Sahyadri College of Engineering and Management

Mangaluru, Karnataka

Bachelor of Engineering in Computer Science and Engineering — CGPA: 8.22

2021 – 2025

Sri Chaitanya PU College

Mangaluru, Karnataka

PCMC — 88.3%

2019 – 2021
